18 September 2025

# The importance of communities in the pursuit of interoperability
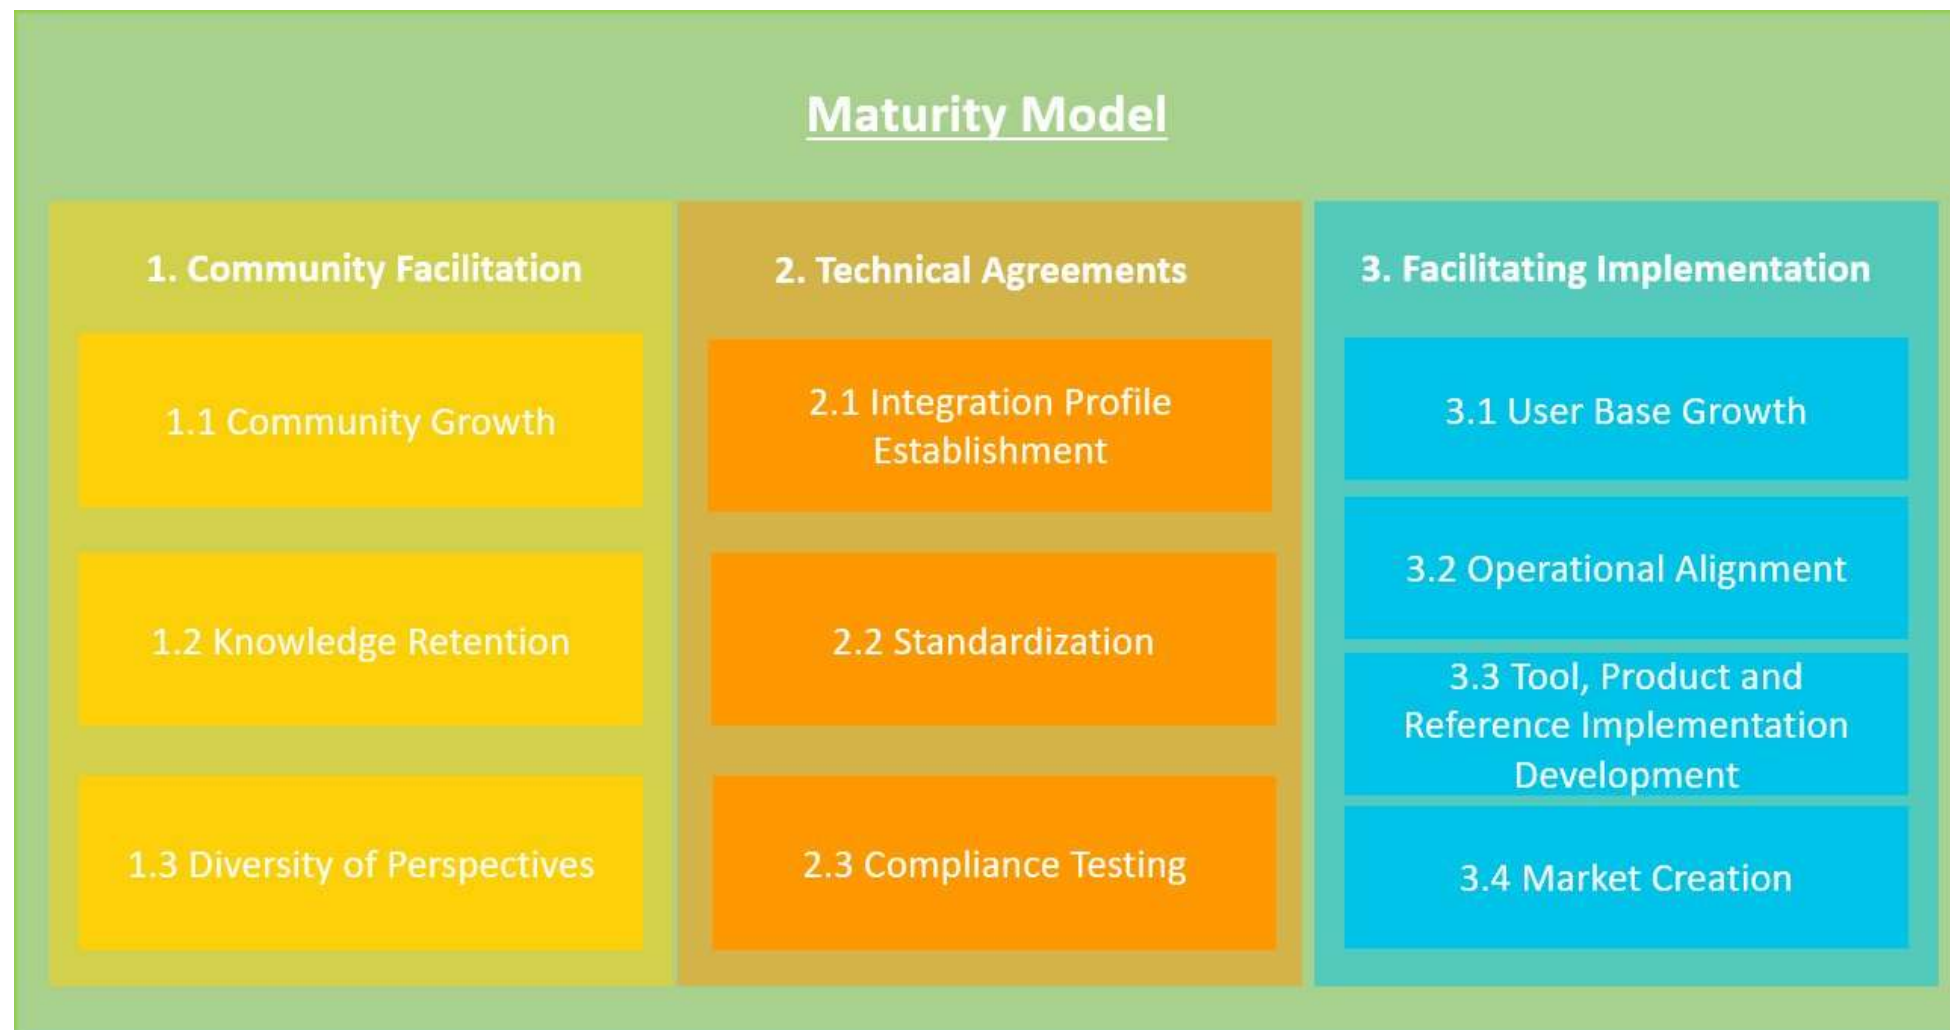

I am sooo interoperable

No! *I* am sooo interoperable

# The importance of communities in the pursuit of interoperability

We are sooo interoperable

Capabilities for interoperability communities

Dimensions

Dimension	Description
Process	The activities, procedures, and workflows an organization follows to achieve its goals, emphasizing documentation, standardization, efficiency, and continuous improvement.
People and organization	The human resources and the organizational structure, including leadership, talent management, employee engagement, and culture.
Information	The management, accessibility, and utilization of data and knowledge within an organization, encompassing data governance, quality, integration, security, and analytics.
Resources	The tangible and intangible resources necessary to deliver the capability; including grid assets, buildings, vehicles, money and intangible assets like intellectual property and brand reputation.

Example results

Conclusions and lessons learned

1. Eminent has successfully identified strengths and weaknesses within multiple interoperability communities.

2. The insights from the reports have resulted in discussions about how the members of these communities could improve their collaboration.

3. 'Communities' have provided a fruitful perspective for thinking about how interoperability comes to exist.

4. The phrasing of the questionnaire is dense and could use improvement

Thank you for your attention.
